STATISTICAL SUMMARY 1950

PRODUCTION AND MARKETING ADMINISTRATION
United States Department of Agriculture

Agricultural Conservation Programs Branch

DECEMBER ▲ 1951 ▲ WASHINGTON; D.C.

INTRODUCTION

This booklet is an annual publication which brings together in summary form, conservation practices carried out, participation, information on payments, and related data with respect to the Agricultural Conservation Program. Information with respect to the 1950 Program is shown by States. Information by States for earlier years has been published in earlier issues of this series, in "Agricultural Statistics," and in the annual reports of the Chief of the Agricultural Adjustment Agency and the Administrator of the Production and Marketing Administration. The Statistics included have been collected by county and State PMA offices.

Data with respect to participation in the various conservation practices under the 1950 Program (tables 1 and 2) were obtained from applications and performance reports. The amount shown under "Total credit value" in tables 1 and 2 was computed by multiplying the extent of a practice or sub-practice by the rate and accumulating where necessary. The "Average rate" shown for each State and practice was obtained by dividing the total credit value by the extent. The "Portion of State total" was obtained by dividing the total credit value for the practice by the total credit value for all practices in the State. The term "States" includes Alaska, Hawaii, Puerto Rico, and the Virgin Islands. The term "counties" includes Production and Marketing Administration administrative areas within such territories and possessions.

Approved under Reports Control No. ACP-137.
